DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group II, claims 7-15, in the reply filed on 8/6/07 is acknowledged. It is noted that Applicant's election is being treated as elected without traverse because Applicant presented no reason explaining why the restriction requirement is improper. Therefore, it is believed that the restriction requirement is still deemed proper and is therefore made FINAL.

Drawings

2. The drawings are objected to because the label for each Figure (i.e., Figure 1, Figure 2, ect.) is not in English. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required

corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Information Disclosure Statement

- 3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.
- 4. The information disclosure statement filed 6/23/05 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.
- 5. The information disclosure statement filed 6/23/05 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because of paragraph #3 above. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing

the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 112

- 6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 7. Claims 7-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7: lines 6-8, the phrases "whose suction side is connected through a suction line" and "delivery side is connected through a delivery line" are confusing and it's unclear what are being claimed; line 8, "the inlet" lacks proper antecedent basis; lines 8-9, the phrase "above the opening at least at one point" is confusing since it's unclear as to what the term "one point" implies; lines 10-11, the phrase "incorporated into the circulation circuit upstream of the inlet to the housing" is confusing and it's unclear what is being claimed; lines 10-11, "the circulation circuit upstream" lacks proper antecedent basis; line 18, "the vertex of the angle" lacks proper antecedent basis; line 19, "the generatrix" lacks proper antecedent basis; lines 17-20, the phrase "the angle between the radius of the circumference...inner wall" is confusing and it's unclear what is being claimed; line 21, "the axis of symmetry" lacks proper antecedent basis; line 21, the phrase "is set true" is confusing since it's unclear as to what the term "set true" implies.

Art Unit: 3644

In claim 12: lines 2-3, the phrase "at least at two points through individual pipes arranged at different levels" is confusing and it's unclear what is being claimed.

In claim 14, line 4, "the chamber" lacks proper antecedent basis.

Allowable Subject Matter

8. Claims 7-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trinh T. Nguyen whose telephone number is (571) 272-6906. The examiner can normally be reached on M-F (9:30 A.M to 6:00 P.M). The examiner's supervisor, Teri Luu can be reached on (571) 272-7045 for the purpose of status inquiry only. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
